EDUCATION

Georgia Institute of Technology

Master of Science in Computer Science — 3.86/4.00 GPA

Master of Science in Analytics — 3.78/4.00 GPA

Atlanta, GA

Aug 2024 – Dec 2025

Aug 2022 – Aug 2024

Florida State University

Bachelor of Science in Computer Science — 3.81/4.00 GPA

Tallahassee, FL

Jun 2017 – May 2021

EXPERIENCE

Software Engineer Intern

Conduent

Aug 2025 – Present

Atlanta, GA

- Engineered LLM vulnerability scanning pipeline achieving 98% accuracy across 500+ enterprise AI applications by implementing ensemble Random Forest + XGBoost models
- Developed vulnerability processing pipeline handling 1,000+ daily findings with Python microservices and Redis caching
- Built REST APIs serving 200+ analysts with 99.9% uptime by implementing FastAPI endpoints with automated alerting

Graduate AI Researcher

Georgia Institute of Technology

Aug 2025 – Present

Atlanta, GA

- Built Python framework reducing local LLM inference costs by 60% through quantization, pruning, and tracking

Software Engineer Intern

Trideum Corporation

Dec 2024 – Aug 2025

Atlanta, GA

- Engineered distributed AI platform capable of processing 290,000+ files using NLP, PostgreSQL, and CUDA with 12+ Docker microservices and load balancing in Python
- Built query and hybrid search systems with 200ms response times using RAG, BM25, and Milvus vector database
- Improved user search experience for 1,000+ users by implementing filtering across clusters, file types, dates, and authors
- Enhanced BERTopic clustering performance 2x through batch processing with PyTorch and multi-threading

Machine Learning Engineer Intern

Shepherd Center

May 2024 – Dec 2024

Atlanta, GA

- Achieved 93% accuracy in predicting pressure ulcers by developing neural network architecture using PyTorch and CUDA
- Built real-time clinical dashboard for 400+ patient datasets using machine learning pipelines with scikit-learn
- Reduced prediction API response time 60% by implementing Flask endpoints with Redis caching and load balancing

Research Assistant

Florida State University

Jan 2019 – May 2022

Tallahassee, FL

- Secured \$289k grant by designing PostgreSQL schema for 90,000+ crime records and building C++ NLP framework
- Reduced analysis time 20 weeks by developing OCR pipeline processing 10,000+ documents with 99% accuracy

Lead Teaching Assistant

Florida State University

Jul 2020 – Dec 2020

Tallahassee, FL

- Achieved 100% student satisfaction rating by developing and grading all C++ coursework for 75+ students

PROJECTS

LitRA | Python, GPT, Llama, Next.js, NLP

[GitHub](#)

- Developed AI literature review assistant capable of processing 2,400,000+ papers with concept mapping interface

Goaldle | Python, OpenCV, YOLOv8, FastAPI, TypeScript, React

[GitHub](#)

- Engineered full-stack computer vision app using the Hungarian algorithm to blur soccer players, handling 1,000+ users

Memory Allocator | C++, Assembly, Cache Optimization

[GitHub](#)

- Built memory allocator 2x faster than glibc on specific tasks using segregated free lists and boundary coalescing

TECHNICAL SKILLS

Languages: Python, C++, Java, JavaScript, TypeScript, SQL

Frameworks: PyTorch, TensorFlow, CUDA, FastAPI, Flask, React, Docker, Kubernetes

Developer Tools: Git, Linux, AWS, PostgreSQL, MongoDB, Redis, Milvus

Concepts: Distributed Systems, Backend Development, Data Structures & Algorithms, Machine Learning, NLP
